**OUR PRODUCTS ARE A PART OF YOUR LIFE**

From power transmission lines crisscrossing the countryside to local service entrance connections to outlet boxes behind the wall and electrical conduit in the ceiling, our products help control the constant - and increasing - flow of power and data. We offer one of the broadest product lines in the industry, supplying over 70% of the items used in a typical electrical application - be it commercial, industrial or residential construction or equipment maintenance and repair or original equipment manufacturing. We also provide market-leading commercial heating and ventilation products.

## Catalog Search Box Options

The **Catalog Search Box Options** provide you with four quick ways to locate specific catalog data with a minimum of effort and time. Simply enter your search information into the applicable box and then click on the search button...this is usually the best place to begin your search.

Enter Search Info into applicable box and then click on Search button....

- **Catalog Number Search** ... use this option when you know the T&B catalog number (default search type is **Exact** but you should select **Contains** as an option if you don't know the complete catalog number or do not get exactly what you are looking for). Simply enter the desired number and click on the SEARCH button to directly view specific catalog data. *Note:* This option works for ALL T&B Catalog numbers...users do NOT have to enter dashes, slashes and spaces...simply enter the alphanumeric characters you are searching.
- **UPC Search**... use this option when you know the exact 11 digit T&B UPC number. Simply enter the desired number and click on the SEARCH button to directly view specific catalog data. *Note:* This option works for ALL T&B UPC numbers...users do NOT have to enter dashes, slashes and spaces...simply enter the numeric characters you are searching.
- **Competitor Part Number Search** ... use this option when you know the exact competitor's catalog number but need to view T&B's equivalent product offering. Simply enter the desired competitor's number and click on the SEARCH button to directly view specific catalog data for T&B's replacement item. *Note:* Users do NOT have to enter dashes, slashes and spaces when entering the competitor's part number...simply enter the alphanumeric characters you are searching. This option works for ALL Competitors' Part numbers we have in our system.
- **Keyword Search** ... this option allows you to enter any keyword terms to find any and all related items of interest. This option is your best choice when you do not know a specific T&B catalog number or T&B UPC number or competitor's part number. Simply enter the keywords that you are looking for and then click on the SEARCH button. This option will allow you to view various search results, refine your search when necessary as well as allow you to "drill down" to specific catalog numbers based on relevant attributes you have selected.

## Browse List Search Options

The **Browse List Search Options** allows the user to select the applicable product category or brand from a detailed listing and drill down to and refine your search to those attributes of most interest. Users can simply click on the desired item(s), perform comparisons, view selector guides when applicable as well as view other related Application Support materials related to your current search criteria.

- **Product Category** ... the browse listing options are located below the Catalog Search Box options under **Filter Your Search**. The major product categories of products offered by T&B Electrical Division are shown in the box below. The number in parenthesis along side the category listing denotes the number of SKU's or items that are currently viewable in our on-line catalog. Our catalog data is continually being updated and expanded to include all of our most popular items. Alternate hard copy printed PDF catalogs information is also provided when applicable to complement our on-line catalog data.

- **Brands** ... .. the browse listing options are located below the Catalog Search Box options under **Filter Your Search**. The major Brands of products offered by T&B Electrical Division are shown in the box below. The number in parenthesis along side the category listing denotes the number of SKU's or items that are currently viewable in our on-line catalog. Our catalog data is continually being updated and expanded to include all of our most popular items. Alternate hard copy printed PDF catalogs information is also provided when applicable to complement our on-line catalog data.

## International T&B Catalog Information

Thomas & Betts is a global company with operations throughout the world. When searching for specific catalog items and brands, please search the relevant web site for that part of the world where the item is being sold. In particular, our T&B European and Canadian web sites offer extensive catalog information for their customers. While we often offer common brands and product lines across borders, specific catalog numbers are frequently unique to a particular region of the world. Our European and Canadian web sites can be reached by clicking on **T&B REGIONAL WEBSITES** at [www.tnb.com](http://www.tnb.com). Thanks for your interest in T&B products.
